MAKE THE MOST OF YOUR SPACE

We are all spending more and more time in our bathrooms. Not just through necessity, but because we enjoy the peace and privacy it brings us. Those little rituals at the start and end of the day help us feel awake and energised, or calm and relaxed.

Even though the role of the bathroom has grown in importance, it's still one of the smallest rooms in the house. In fact, in many homes, this relaxing haven is just six feet square or less.

At thirty6 we understand the realities of designing for smaller spaces. Design pioneer Terence Conran believes that just because a room is limited in scale, it doesn't have to be limited in style. We wholeheartedly agree and this is the principle behind our thirty6 designs.

Every product we make is purpose designed and handcrafted for compact bathrooms, while looking equally at home in larger spaces. Our innovative yet affordable MyHome collection brings you a range of thin-rim basins, mixer combinations, original shapes and clever storage that allow you to make the absolute most of your space.

Our unique, space-enhancing approach is perfect for small bathrooms (p8), en-suites (p12) and cloakrooms (p16). Our designs look great in larger bathrooms too, allowing you to create a consistent look across your entire home. To see just how our products can maximise your space, take a look at our product listings starting on p20. If you want to discover more about what makes thirty6 special, turn to p6.

We know that the need for good design doesn't just apply to fittings and furniture – a lot of it is down to finding the right layout, too. To give you a head start, we've used our expertise in bathroom design to produce a range of floor plans and 3D visualisations for common bathroom shapes. Find them from p62.

Ultimately, you'll find that you don't need space to create a beautiful bathroom. All you need is thirty6.

QUALITY DESIGN AND CONSTRUCTION

At thirty6, we have one very simple aim: to make beautiful products that transform average-sized spaces into truly luxurious bathrooms. We demand the highest standards in everything we do, sourcing the best materials and working with skilled designers, artisans and engineers who share our commitment to quality.

CERAMICS

Successful design is all about detail. To make the most of compact spaces, we designed washbasins with thin, elegant rims, to maximise the internal space, and integrated short-projection toilets to maximise the space of the room.

To make these delicate shapes, we manufacture our ceramic pieces in high-fired white porcelain, which includes English china clay from Cornwall. In casting the pieces, our artisans combine traditional and state-of-the-art techniques for the best possible finish.

Other features – including seats that lift off for easy cleaning and have soft-close hinges – are designed to make your bathroom a pleasure to use, every day.

TAPS, MIXERS AND SHOWER MIXERS

Our taps and mixers are designed to complement the smooth lines of our baths and basins, and our scaled-down mini mixers look perfectly in proportion with basins sized 50cm or smaller.

All mixer bodies are cast from solid brass, while all working parts are crafted in metal and chrome plated for longevity. The water flow is controlled by diamond-hard ceramic-disc cartridges, which prevent dripping and make them smooth and easy to use. In our shower mixers, the thermostatic controls use sensitive wax elements for the fastest response to changes in water pressure and temperature.

All our mixers are subject to rigorous endurance testing equal to over 20 years of normal use.

BATHS

We only use Lucite acrylic for our baths – it gives the highest durability and a smooth, high-quality finish. The baseboard of each bath is fully reinforced for superior strength and rigidity, and a reinforced moulded bath panel for rectangular baths is also available.

SHOWER TRAYS

Our shower trays are constructed around a sturdy metal frame for a rigid installation and moulded in a special anti-bacterial acrylic for easy cleaning. Trays are also available with an anti-slip finish.

SHOWER ENCLOSURES

Made to last, our shower enclosures are manufactured from a 6mm-thick toughened safety glass. Each enclosure is 1950mm high, which prevents splashing and gives you extra room for washing.

FURNITURE

All our furniture is made to exacting standards from high-quality, 18mm-thick MFC. When it comes to fittings, we use smooth-action, soft-close drawer runners, three-way adjustable Hettich hinges and adjustable feet for uneven floors. All models are designed with a concealed void for piping and waste pipes to be hidden. Everything conforms to Furniture Industry Research Association (FIRA) certification standards.

TESTING AND APPROVALS

All products in the thirty6 range are manufactured to meet or exceed all European and British Standards. Products are certified as required by the appropriate third party test houses such as WRAS, Kiwa or NSF.

GUARANTEES

All products have a long guarantee against manufacturing defects and will provide great service for many years. Replacement wear and tear items are readily available. thirty6 offers an extensive guarantee on all products ranging up to 25 years, please see the website for full details.

FEEL MORE SPACIOUS

Your bathroom should be a comfortable place where you can really relax.

Sensitive design makes all the difference in a small space. At thirty6, we create practical, inviting bathrooms by considering the room as a whole. Our designs aim to create space between the fixtures in your bathroom, which instantly makes it look and feel more spacious.

Our innovative furniture range provides easy ways to keep your room clear and clutter free. And the MyHome thin-rim basin gives you the same interior dimensions as a normal 56cm model, but takes up less room. Browse our furniture (p54) and basin (p20) sections for more ideas.

If you opt for a combined bath and shower you might be tempted by our Xofill fitting (p42), which gives you precision temperature control for both. Take a look at our bath (p28) and shower (p44) sections to explore your options.

We know it's not always easy to visualise how your new bathroom could look, so we've done the hard work for you. Turn to p62 to see a selection of designs for small bathrooms – there's sure to be one just like yours.

MAKE SMALL BATHROOMS...

MAKE EN-SUITES...

A JOY TO USE

An en-suite should be the perfect place to get some privacy at the start or end of your day.

With a little help from thirty6 even the smallest en-suite can become a pleasure to use. So if the design or layout of your room feels restrictive, it could be time for a rethink.

The shower is often the centrepiece of an en-suite, but it doesn't have to dominate the room. Our shower trays come in a wide range of shapes and sizes, while our 1950mm-high enclosures give the shower some useful extra height. Browse our trays and enclosures from p48.

The compact designs of our MyHome toilet suites (p24) and thin-rim basins (p20) take up less space in your bathroom, plus you can match your basin with different mixers (p34) for a more individual look. To add some handy storage space, take a look at our furniture range on p54.

If you need help planning your en-suite, our design section is a great place to start. Browse our 2D designs and 3D visualisations on p66 for some ideas and inspiration.

MAKE CLOAKROOMS...

www.thirty6bathrooms.co.uk

MORE WELCOMING

Cloakrooms should be a practical and welcoming place to freshen up.

Typically a cloakroom will feature just a basin and toilet. Our purpose-designed products will fit neatly in even the tiniest cloakroom, making it a comfortable place for you and your guests to refresh.

With our help you can make the most of every square inch. Our short-projection basin and furniture (p57 & 59) add useful storage without taking up precious space, whether you'd like a cupboard under the basin or a wall-mounted cabinet.

When it comes to MyHome basins on p20, even the smallest models are perfectly proportioned for ease of use. Our short-projection basin has a thin rim and angular shape to maximise capacity and save space, while our corner basin will fit neatly into an extra tight spot. Pair with one of our mini mixers (p34) to complete the look.

We've made a special seat to fit with the compact design of our toilets, which will help you maximise space without compromising on function or appearance. You can browse our full range of toilets on p24.

If you need help with your floor plan or would just like to visualise your new cloakroom, have a browse of our design ideas on p70.

BASINS

thirty6 brings innovative design in the MyHome basin range with soft square shapes and thinner rims to maximise internal space.

MYHOME BASIN RANGE

A purpose-designed basin can make a world of difference in a small bathroom. Square shaping and thin, stylish rims ensure all of the basins in our MyHome range offer maximum internal space while taking up as little room as possible. In fact, our 50cm basin is internally bigger than most larger

basins, while in even smaller spaces our 40cm option looks just right. Add to these solutions the semi-countertop, countertop, corner and short-projection variants, and you're able to boost both convenience and space.

MyHome 55cm ITH Basin
Suitable for wall mounting or use with full pedestal or semi pedestal

TOILETS

MyHome toilets blend together compact dimensions with elegant and smooth design. With close-coupled, back-to-wall and wall-hung options there is a model for every installation. The matching soft-close seat completes the contemporary look.

OUR TOILET RANGE

The way toilets are installed makes a huge difference when you're looking at maximising space. Our wall-hung and back-to-wall installation options are two great ways to make bathrooms look and feel roomier. Our toilets are very compact with short projection into the room, plus added comfort features like a higher than average seat height.

All our toilets feature an easy-clean rim and a dual-flush cistern. Using just 4.5 litres of water for a full flush and 3 litres for a reduced flush, they are incredibly economical. The integrated toilet seat has soft-close hinges and are easy to remove for cleaning. Finally, combining the toilet with a furniture unit will neatly hide away the plumbing.

BATHS

With a vast selection of bath shapes and sizes and our design expertise, thirty6 makes bathing fit perfectly into your bathroom.

OUR BATH RANGE

Baths present a particular challenge for small bathrooms as they can't be significantly reduced in size. That's why we produce a wide range of models, including L-shaped and P-shaped baths, to fit perfectly into any room. All are manufactured to exceptionally high-quality standards, with fully reinforced baseboards giving superior strength and rigidity. Plus, there's the option to add reinforced panels too.

If you'd like the flexibility of an over-bath shower, you'll find a range of matching bath screens for every size and shape of bath. Plus, take a look at our innovative Xofill fitting, which removes the need for a rim-mounted mixer and creates a much cleaner look.

OUR TAPS & MIXERS RANGE

We offer three styles of taps and mixers – Mode, MyHome and Trend – and the Mode and MyHome ranges include mini mixers that look perfect on smaller basins. We've used the highest-quality materials, too. All fittings have solid metal handles and work with ceramic-disc cartridges, which prevent dripping and give a smooth action that's a joy to use.

Our MyHome mixers are designed to look just right on our MyHome basins, and all of them have matching bath and shower mixers to give you a stylish, coordinated look throughout your home.

TAPS & MIXERS

With a variety of styles and sizes available, thirty6 offers mixers that are specially designed to suit all the MyHome basins and baths.

MYHOME

With its softly rounded square shapes, this contemporary style is designed to match the angular curves of the MyHome ceramic range. The basin mixer comes in two sizes, with the mini mixer looking perfect on basins sized 50cm or smaller:

Bath fittings are raised from the bath rim for easy cleaning and an elegant look. All fittings are operated with high-tech ceramic-disc cartridges, for a smooth action and no dripping.

MODE

The clean, flowing lines of this design work perfectly in a contemporary bathroom, en-suite or cloakroom. The range features basin and bath taps as well as two basin mixer sizes – match the compact mini mixer with smaller-sized or

cloakroom basins. As with all our fittings, Mode taps and mixers feature high-tech ceramic-disc cartridges, which prevent dripping and turn on and off smoothly and easily.

INTRODUCING XOFILL

Xofill is an ingenious bath fitting that acts as both an overflow and a filling spout. It means rim-mounted taps and mixer units are a thing of the past, giving the bath a cleaner, less cluttered look.

It also gives you complete control of the water temperature – a reassuring safety feature for many families.

Xofill is used alongside the built-in thermostatic shower valve with three controls. The middle handle controls the temperature, with the top handle for shower flow and the bottom handle for bath fill (model **D98533 T6BIT3CSVC**). For bath fill only there's the built-in single outlet thermostatic valve (model **D98532 T6BITSVC**); both are available with a choice of handle designs.

THE SHOWER MIXER RANGE

When choosing from our range of thermostatic shower mixers you'll find that each type offers its own benefits. The **bar valve** mixer is fitted to the wall, making it easy for the plumber to install, and is operated using two handles, one for flow control and the other for temperature. A **combination bar valve** is a complete shower and offers the same features alongside a diverter control, which switches the flow to the flexible hose and handspray or fixed overhead shower provided.

Built-in shower valves are a little different – they are built neatly into the wall to leave only the faceplate and handles on display, and you can choose round or square handles to coordinate with the rest of your bathroom; all face plates and handles are manufactured in high quality chromium

plated brass. The **built-in valve with diverter** also allows you to divert to a flexible or fixed overhead shower.

Finally, there's the **built-in three-handle valve**. The centre control is for temperature, then the two on the outside can either be used to operate different shower heads, or one for the bath and one for the shower. Alternatively, it can also be used with the Xofill bath fitting.

All options are thermostatically controlled for safe showering. The valve will adjust to changes in water pressure and incoming water temperature, while a safety stop at 38 degrees prevents the shower from scalding. If the cold water fails, the valve shuts off immediately.

SHOWER MIXERS

We offer a range of thermostatic shower mixers bringing different functions and benefits. Take a look to see which one's right for your home.

THE SHOWER TRAY & ENCLOSURE RANGE

With a variety of shapes and sizes of shower trays available, including square, rectangular and quadrant trays, we have the model to suit your particular space. All of our trays are 35mm high making them an easy step in and out. They are constructed with an inner core of metal and using an easy-clean anti-bacterial acrylic material. For added safety all of our trays are available with an anti-slip finish.

Made from a toughened safety glass, our shower enclosures are available in a range of sizes and with a pivot door, smooth-action sliding door or walk-in design. Each enclosure is 1950mm high – this is unusual in this price bracket, and the extra height both prevents splashing and gives you more room. Finally, all options are designed for easy cleaning, helping you keep them looking pristine.

SHOWER TRAYS & ENCLOSURES

Making the most of your shower area means finding the perfect fit. That's why thirty6 offers shower trays and enclosures in a wide variety of shapes and sizes.

FURNITURE

thirty6 offers a wide range of fitted, modular and wall-hung furniture units to give you valuable storage space.

THE FURNITURE RANGE

One of the most desirable features of a modern bathroom is storage – somewhere to stow all the toiletries and products that can clutter an otherwise pristine space.

Our furniture range gives you a choice of three options to suit your family needs and the layout of your room. Fitted, modular floor-standing and modular wall-hung units

help you make the most of every spare inch, while the coordinating mirrored cabinet looks great above the basin. Whatever you opt for, choose from sleek, modern finishes in grey gloss, white gloss or oak, and surface tops in black or white gloss.

MODULAR WALL-HUNG

Wall-hung furniture enables you to fit more into a small room without taking up any extra floorspace. Our convenient soft-close drawer units are a stylish way to keep the essentials close to hand, and can be matched with a

built-in countertop basin or a modern vessel basin unit. In smaller spaces like cloakrooms, the short-projection basin unit is an elegant cupboard solution that maximises space.

MODULAR FLOOR-STANDING

Our spacious modular floor-standing units make an attractive focal point for any bathroom. Choose a built-in countertop or semi-countertop basin, or achieve a very modern look with a vessel basin unit.

For the cloakroom, the short-projection basin unit is a stylish and practical option that takes up very little space. The 40cm basin or corner basin floor-standing units take up no more space than a traditional pedestal but provide some much-needed storage.

FITTED

Fitted furniture not only looks great but is also a simple, easy way to hide bathroom plumbing. The semi-countertop basin unit gives you a spacious storage cupboard and can be connected to a choice of toilet units for back-to-wall or

wall-hung toilets, both of which include a concealed cistern. Personalise the look with your choice of worktop finishes and a full-length plinth to give a neat, modern appearance.

DESIGN

MAXIMISE YOUR SIX BY SIX

The MyHome range is full of different models and sizes to help you achieve exactly the look you want. Whatever you choose, every product's been designed to look great in a small bathroom.

When it comes to getting the most out of your bathroom, en-suite or cloakroom, the layout is just as important as the products you choose. Our design team are experts in both, so in this section we've put together some sample room layouts to give you a few ideas of how your space could look.

Over the following pages you'll find basic floor plans, three-dimensional images created with computer-aided software, and high-resolution visualisations of eight different room designs. Hopefully you'll find plenty of inspiration to get your project started.

FLOOR PLANS

These are your starting point. A well-considered layout can make all the difference in creating a functional and comfortable room. Just repositioning a bath or replacing it with a shower could open up the space and completely change the way the room feels.

Your installer will tell you what's possible in your room when they visit. In the meantime, we've done a lot of the hard work already and created a series of different designs for typical bathrooms, en-suites and cloakrooms.

THREE-DIMENSIONAL IMAGES

We've used the innovative Virtual Worlds bathroom planning system, featured in many showrooms, to bring the floor plans to life and really help you start to imagine how your room will look.

These three-dimensional images are a really effective way to help plan your room and will give you a much better understanding of how we can make the most of a compact space. Ask your showroom if they can give you a Virtual Worlds image.

HIGH-RESOLUTION RENDERINGS

These rendered images give you a brilliantly realistic impression of how the finished room will look. They prove that, with the right products and design, even small spaces can be transformed into stunning bathrooms.

BATHROOM 01

The simple, square layout of this bathroom is typical of many British homes. Clever spatial planning, together with the innovative designs in the MyHome range, make it feel both modern and spacious.

Here, the 50cm thin-rim basin gives you plenty of space for washing, while the close-coupled back-to-wall toilet has one of the shortest projections available. Both help maximise space in the bathroom and are fitted right against the false wall to hide the plumbing.

To add a shower over the bath, you can simply upgrade it with a combination shower unit and shower screen. Positioning the basin and toilet opposite the entrance opens up the floor space, while a mirror on the far wall also helps to make the room appear more spacious.

PRODUCTS IN THIS SETTING

- 50cm basin and pedestal with MyHome mini basin mixer
- Close-coupled back-to-wall toilet with integrated soft-close seat
- 170cm MyHome bath and panel with MyHome bath filler and waste fitting
- Complete setting price including wastes RRP £913.12
- Complete setting price but substituting with Mode mixers and open back toilet RRP £797.96

All prices are RRP and include VAT at 20%.

BATHROOM 02

Bathroom 2 is very similar to Bathroom 1 in its shape and design, but has been upgraded by switching the bath for a compact shower bath. With its curved shower area and matching screen, this bath gives plenty of room for showering and only projects 10cm further into the room than the rectangular bath.

This small change gives a much more flexible space that's ideal for families. The built-in shower is thermostatically controlled, giving you peace of mind and the convenience of always having the perfect temperature. We've shown it here with a fixed head, but you could choose a flexible hose or handspray (or both) from the thirty6 range.

PRODUCTS IN THIS SETTING

- 50cm basin and pedestal with MyHome mini basin mixer
- Close-coupled back-to-wall toilet with integrated soft-close seat
- Compact shower bath (RH), curved bath screen, MyHome bath filler; and two-handle built-in thermostat with fixed head
- Complete setting price: RRP £1376.53

All prices are RRP and include VAT at 20%.

BATHROOM 03

Bathroom 3 is similar in shape and layout, but brings a fresh new twist. The L-shaped bath is installed the opposite way round, with plumbing for the bath and shower hidden by the false wall.

The innovative Xofill fitting on the bath means that one wall-mounted thermostatic control can be used to run the bath or shower, giving you complete comfort and safety. As the water is turned on and off from outside the shower area, you also avoid those chilly few seconds while the hot water comes through.

With no need for a rim-mounted bath mixer, the bath looks less cluttered and is easier to clean. The false wall gives you recessed shelving for storing toiletries, while the furniture unit under the basin keeps everything else hidden out of sight. It all gives the room a modern, luxurious feel.

PRODUCTS IN THIS SETTING

- 50cm basin with wall-mounted furniture and MyHome mini basin mixer
- Close-coupled back-to-wall toilet with integrated soft-close seat
- L-shaped bath and shower screen, with Xofill supply and overflow fitting
- Wall-mounted built-in thermostat with three handles, supplying fixed head shower and Xofill bath fitting
- Complete setting price: RRP £1793.80

All prices are RRP and include VAT at 20%.

EN-SUITE

EN-SUITE 01

En-suite 1 features a spacious walk-in shower in place of a bath, allowing you to wake up each morning with a truly luxurious experience. A false wall at one end conceals pipes and provides a neat recessed shelf.

It's an incredibly functional space too. A one-metre long fixed glass panel provides a large wet area while also leaving a substantial amount of the shower floor dry.

PRODUCTS IN THIS SETTING

- 170cm x 80cm shower tray with 100cm fixed side panel, built-in thermostatic shower with fixed head
- Close-coupled back-to-wall toilet with integrated soft-close seat
- 40cm basin with MyHome mini basin mixer and matching wall-mounted furniture
- Complete setting price: RRP £1822.71

All prices are RRP and include VAT at 20%.

EN-SUITE 02

This compact en-suite has been designed to fit in the corner of a bedroom. For this type of layout, a corner shower is ideal as it maximises space and becomes the focal point in the room. Here, we've shown a thirty6 corner shower tray and enclosure, which comes in three different sizes to suit the available space. The basin shown here is the compact 40cm model, which is fitted on a full pedestal.

PRODUCTS IN THIS SETTING

- 40cm basin with MyHome mini basin mixer and pedestal
- 80cm quadrant shower tray with matching enclosure
- Built-in thermostatic shower mixer with fixed head
- Close-coupled back-to-wall toilet with integrated soft-close seat
- Complete setting price: RRP £1119.57

All prices are RRP and include VAT at 20%.

EN-SUITE 03

En-suite 3 shows one way to convert a separate toilet into a compact shower room. The door is moved to the wall adjoining the bedroom, giving space to fit a shower at one end and a back-to-wall toilet at the other. This layout, combined with MyHome designs, gives a really modern and spacious feel. Here, the walk-in shower has a thirty6 slider entry door to save space. It features a combination exposed thermostatic shower, with both a flexible hose and handspray and a fixed showerhead. On the wall facing the door, a furniture unit with a full countertop ceramic basin gives a sleek, luxurious look.

PRODUCTS IN THIS SETTING

- 1200mm x 800mm shower tray with 1200mm slider door
- Thermostatic exposed combination shower with both fixed head and flexible hose and handspray
- Back-to-wall toilet with integrated soft-close seat
- 60cm countertop basin with MyHome basin mixer, matching wall-mounted furniture unit
- Complete setting price: RRP £1643.00

All prices are RRP and include VAT at 20%.

CLOAKROOM

CLOAKROOM 01

Whether it's tucked away in a corner or even under the stairs, your cloakroom is probably the smallest room in the house. Introducing the MyHome range and a little smart design will help you make the most of this compact, but extremely useful, space.

In Cloakroom 1 a close-coupled back-to-wall toilet is combined with our short-projection basin and matching furniture. All the pipework is cleverly hidden, and you get the added advantage of some much sought-after storage. The minimal styling and careful layout results in a fresh, modern and comfortable space.

PRODUCTS IN THIS SETTING

- Close-coupled back-to-wall toilet with integrated soft-close seat
- Short-projection basin with MyHome mini mixer and matching furniture
- Complete setting price: RRP £714.67

All prices are RRP and include VAT at 20%.

CLOAKROOM 02

Cloakroom 2 is an L-shape with a sloping ceiling – the type of room you might have under the stairs or in a sloping roof space.

Here, we've used these features to our advantage. A purpose-built toilet unit with a built-in shelf flows neatly into the sloping ceiling to create an attractive shape, and the back-to-wall toilet both hides the plumbing and gives a sleek, elegant look.

The short-projection basin opposite the toilet makes the best use of the available area, and gives you the option to add matching furniture for some useful storage.

PRODUCTS IN THIS SETTING

- Back-to-wall toilet with integrated soft-close seat
- Short-projection basin and pedestal with MyHome mini basin mixer
- Complete setting price: RRP £424.89

All prices are RRP and include VAT at 20%.
